

Date:

1830

Identifier:

T0088a-b

Description:

Excerpt from the Thaw Catalog: Daggers of this type were manufactured in England or Scotland for the western Canadian fur trade during the early decades of the 19th century. Their hand-carved handles of horn or bone always show brass and bone discs around the rivets that hold the steel blade in place. It seems that Fort Garry, present-day Winnipeg, was the major distribution point of these well-crafted knives, for most of the knife sheaths were decorated with loom-woven quillwork of Red River Ojibwa type and/or the delicate floral quillwork in which the local Metis women specialized. Sotheby's 1992, lot 118; Vincent 1995a, p.43.

Physical dimensions:

height 14 in ; width 4.5 in ; depth .75

height 14 in ; width 2.75 in ; depth .5 in

Format:

Knife and Sheath

Coverage:

Manitoba ; Anishinaabe (Red River Ojibwa)

American Indian Art
